

temporary fencing solutions

Introduction

You're in safe hands with ATF

Welcome to ATF, the Australian owned, market leader in the supply of quality solutions for temporary fencing and height safety. For over 20 years throughout Australia and New Zealand, ATF has built a reputation for delivering an extensive range of smarter safety solutions, through superior product quality, backup and service. Whether you're in mining, civil, residential, government, industrial, commercial, maintenance or events industries, ATF has the product range, knowledge and experience to manage your project from pre-planning to completion. We appoint an Account Manager to work closely with you to tailor a solution to suit your needs, someone who understands local compliance issues, someone who will help you meet your critical construction or event schedules saving your company costly delays and importantly, unwanted injury. All ATF equipment is locally made and rigorously tested to meet the highest Australian standards and the toughest conditions. For all your temporary fencing and height safety solutions, don't compromise, talk to ATF today.

Why choose ATF Temporary Fencing Solutions?

ATF has developed a large range of temporary fencing solutions and accessories to suit any project large or small. ATF has been the preferred supplier at many of Australia's leading events such as the Sydney 2000 Olympics, Melbourne 2006 Commonwealth Games, Sydney Mardi Gras, World Youth Day, V8 Supercars, World Cycling Championships and Royal Easter Shows along with the largest residential and commercial industrial builders in Australia and New Zealand. ATF advantages include:

- Temporary Fencing and Hoardings are rigorously tested against AS 4687:2007
- ATF pro-actively provides Safe Work Method Statements, Site Specific Risk Assessments, Engineer Testing Certificates, Handover Certificates
- Constant professional support allowing construction free from the interruptions of complicated safety systems
- Largest range of fencing accessories
- Range and speedy delivery with over 600,000 fence panels available
- Comprehensive installation and dismantling services
- Broadest geographic coverage across Australia

For all your temporary fencing and height safety solutions, don't compromise, talk to ATF today.

Mesh Fence Panels

The ATF Mesh Panel Fence system is the toughest and safest in the country, which is why others follow our lead. Our Mesh Panels have been manufactured to give a panel with the same versatility as the chain wire panel with the added strength of a mesh panel. With the structural strength to support itself, it does not require additional bracing to support the fence (unless a cover is placed on the panel to increase the wind loads). With a galvanised finish and fully welded frame, the system offers a total package for your site, giving a system that is user friendly to you and the general public.

Panel Size: 2.1 metres x 2.65 metres with 1.8 metre high mesh infill

Block Size: 600mm x 220mm x 150mm weighing approximately 36kg

Note: Special shapes and sizes can be supplied

Australian Patent No. 640807 applies

Security Compound Fencing

ATF Security Compound Fencing is the ideal solution for locations that need extra seclusion and a higher level of security. Perfect for major events or gatherings to secure important equipment, or for remote construction sites to reduce unlawful activity causing business disruption, or for airports, government facilities, or works. ATF Security Compounds are easy to erect and available with extension panels and barbed wire to restrict entry through or over the fencing.

The toughest and safest in the country, which is why others follow our lead.

- 1 Civil Construction site fencing
- 2 Ideal for all Events
- 3 Residential Construction
- 4 Securing Infrastructure projects

Pedestrian Gates

ATF provides the industry's greatest range of fencing accessories to enhance our service offering. These accessories include Pedestrian Gates for temporary fencing, which provide suitable designated access / egress points for any construction site. Unlike a normal temporary fencing site gate which is usually a panel that is not secured into the block allowing a swinging panel, ATF Pedestrian Gates are smaller and purpose built to work like a standard gate rather than mesh panels. As they also look different from the usual mesh panel they make site directions easier for all site traffic.

- 1 Pedestrian gates for access/egress
- 2 Compound fencing
- 3 Gate wheels allow easy opening and closing
- 4 Gate latches, an alternative to the padlock and chain

Temporary Waste Bins

ATF has come up with a great alternative to the skip bin, the ATF Temporary Waste Bin, a temporary enclosure that can act as a temporary waste bin or storage. Hired as a kit, it comes with ATF temporary fencing panels, extension panels, concrete blocks, clamps, and optional shade cloth. Easy to install and dismantle, sizing is up to you. Perfect for high volume domestic home builders or for events, ATF Temporary Waste Bins are the flexible and affordable alternative.

Easy to install and dismantle, sizing is up to you.

Accessories

- Barbed Wire (1 row or 3)
- Extensions (To an overall height of approximately 3 metres)
- Shade Cloth (Extra bracing required)
- Hessian (Extra bracing required)
- Handrails (Fitted to every 2nd panel)
- Dog Proofing to prevent entry / exit below panel (Fitted to every panel)
- Pedestrian Gates
- Vehicle Gates
- 1/2 Panels
- Safety Signs
- Chains and Padlocks
- Gate Latches

1
Barbed wire extensions

2
Coloured shade cloth

3
Extension panels provide greater protection for remote sites

4
Standard shade cloth

5
Dog proofing preventing site access underneath the
fence panel

How does ATF Solutions compare to our competitors?

As a company, ATF prides itself on the products, knowledge and services we offer, developed over 20 years. Our solutions are tailored to our customers' needs from pre-planning to completion. Our knowledge of Government and other legislative body requirements means we only offer a high level of safety compliance with all construction work. It all adds up to solutions that offer more safety and true value for money. To compare "apples with apples", below are the questions you should be asking any temporary fencing or height safety supplier including ATF:

- Does your product comply with Standard: Temporary Fencing - (AS4687 - 2007) Temporary Fencing & Hoardings?
- Are you allocated an Account Manager to look after your needs from pre-planning to completion?
- Is your company compliant with the Construction Industry National Code of Practice?
- Are your products tested and engineer certified, including wind rating?
- Can I see the testing certificates?
- What Occupational Health & Safety documentation do you support your product with?
- Does your company have a Safety Management Plan?
- Do you have an Occupational Health & Safety point of contact within your organisation?
- Do you provide training for your employees or contractors?
- Are your employees / contractors aware of site rules regarding induction and reporting?
- How much stock do you have?
- Where are your branches located?
